

Clip Set Installation Guide by Smart Retract

Important: This installation is for use with pets only.

Parts Included: 2 Clips

Tools needed: #2 Phillips screwdriver, pencil, measuring tape

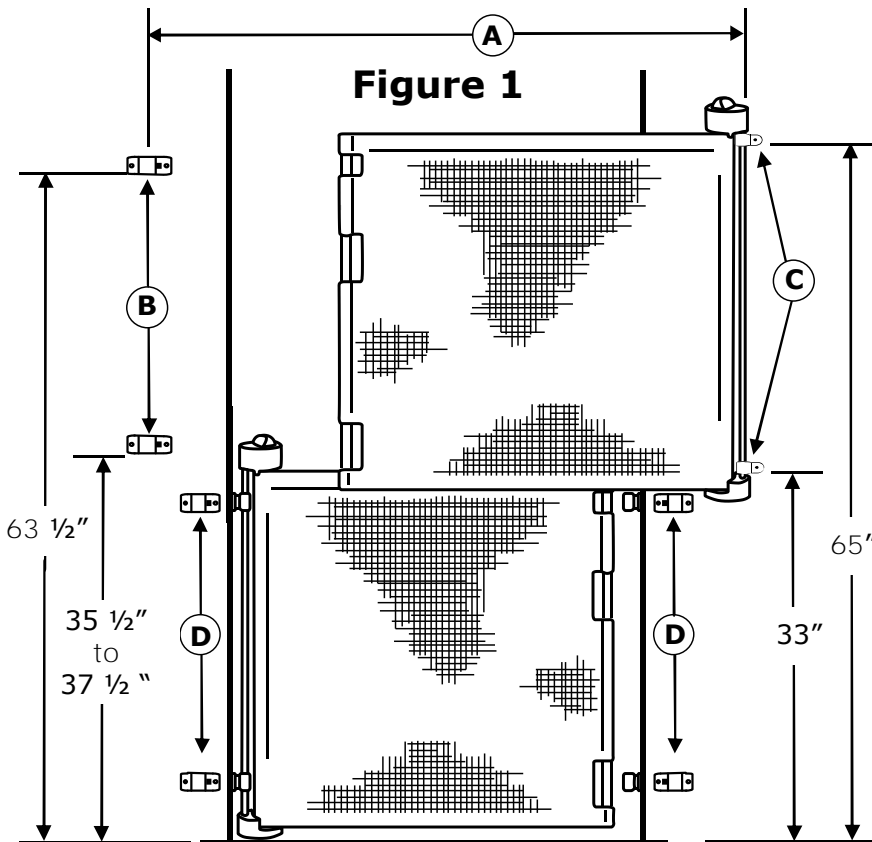

Note: It's helpful to have a second person when installing the upper gate, but not required.

Lower Gate Installation

The lower gate needs to be installed first, following the Retract-A-Gate User's Guide (no installation changes are necessary for the bottom gate installation).

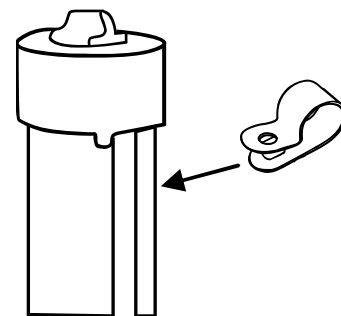

Upper Gate Installation – Use only two of the included wall brackets

1. The upper reel side should be mounted on the opposite side of the lower gate reel. (**Fig. 1**)
2. Snap both Clips to the tie rod (**Fig. 2**) on the gate before screwing the clips to the wall.
3. The bottom of the top Clip should be approximately 65" off the floor.
4. The bottom of the lower Clip should be approximately 33" off the floor.
5. The Clips (**Fig. 1-B**) should be at least 1 ½" to the right of the brackets of the gate below.
6. The brackets (**Fig. 1-A**) should be at least 2" to the left of the brackets of the gate below.
7. The bottom of the lower wall bracket should be between 35 ½" and 37 ½" off the floor.
8. The bottom of the top wall bracket should be mounted approximately 63 ½" off the floor.

- (A)** - Keep the horizontal distance between the upper bracket and clip identical to the lower bracket and clip **(up to the maximum opening)**
- (B)** - Brackets for upper gate
- (C)** - Clips
- (D)** - Alternate bracket location for lower gate
